config

Grade Range	Assessment	Analytics	Member	UX Report	Deployment	Trainer
Starter	Test assessments loaded from yaml file consisting of weight, chest, thigh, upper arm, waist, hips	List of all assessments	Member model: name, email, password, address, gender, height, startingweight. Single member loaded from yaml file	Web Development Assignment 2		
Baseline	Multiple Assessments associated with single user in yaml file. Form to add more assessments in UX	+Current BMI				
Good	Dashboard shows assessments for logged in user.	+BMI Category	Signup + Login forms allowing new members to singup	Outline Report		
Excellent	includes comment field	+deal Body Weight +shared <b>code</b> with programming assignment	Account Settings View allowing user to change details	Detailed Report	Deployed	Trainer Accounts (preloaded from yaml). Trainer logs in and can comment on any assessment.
Outstanding	Date/Time for each assessment. Assessment always listed in reverse chronological order	+Trend via simple red/green label +shared <b>component</b> with programming assignment	Members can delete individual assessments	Enhanced Report	Deployed + Git Repo	Trainers can delete any user

# ICT Skills Assignment

Implement *Web Development Assignment 2* using Javascript/Glitch

Augment the solution to include **Goals**

A Goal has

- a date
- a measurement(s)
- a status (open, missed, achieved)
- can be set by a user OR a trainer
